

MICROSOFT POWER PLATFORM ETWA ACCELERATOR

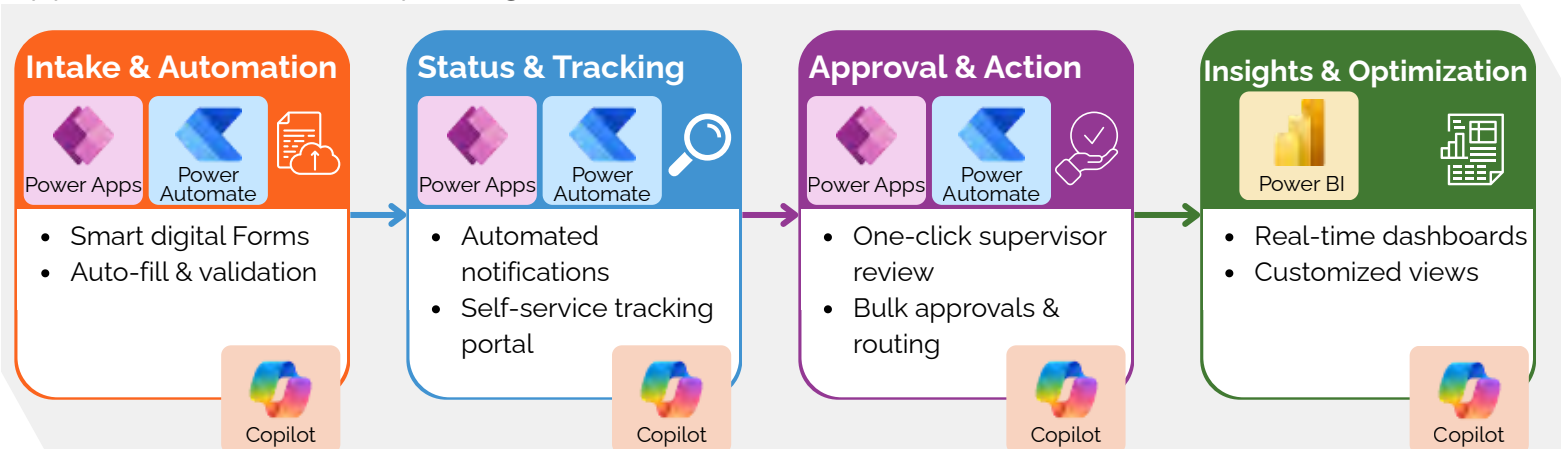

(ELECTRONIC TELEWORK AGREEMENT)

Digitizing Telework Agreements. Streamlined & Compliant.

Government agencies need an **EFFICIENT** and **DYNAMIC** way to track telework and remote work agreements. Our Electronic Telework Agreement application, built entirely on the Microsoft Power Platform, enables federal employees to quickly submit or update telework agreements, supervisors to review and approve requests, and HR teams to easily track and view **REAL-TIME METRICS** for telework agreements.

Metaphase utilizes Solutions in the Power Platform to package and deploy fully functional apps to any environment, reducing the time to deployment while also tailoring each screen to unique agency requirements. With our accelerated implementation, agencies can **IMMEDIATELY OPTIMIZE** telework and remote work tracking, supervisor approvals, and OPM reporting.

Benefits

Custom Branding: Apply agency colors, fonts, themes, and seals to brand each application to your agency according to agency branding guidelines.

Real-time Metrics: Easily view, sort, and filter dynamic data in interactive dashboards with Power BI.

Instant Reporting: Pull critical metrics for external entities such as OPM in minutes.

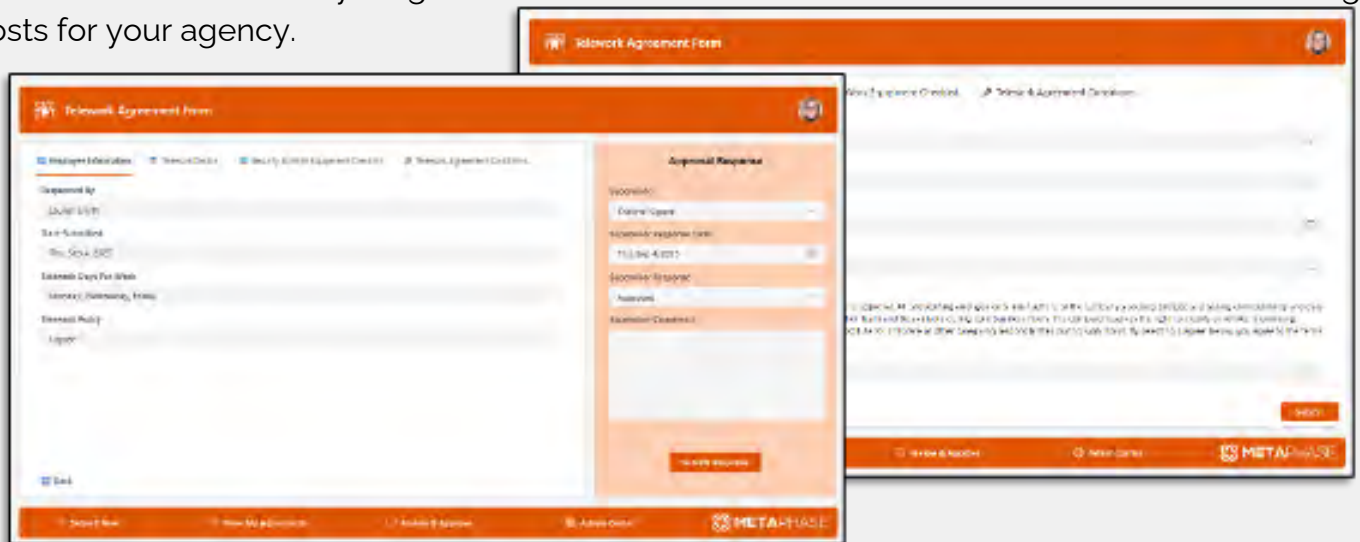

AI Ready: Native Copilot integration means the full power of AI is within reach, with no code.

Single source of truth: Authoritative, intuitive application with the information you need to make data-driven decisions on staffing and resource management.

Curated Information: Screens and views tailored to each employee based on their role and need-to-know.

Security and Compliance: Role-based access with the identity management we've come to trust from Microsoft.

Cost Efficient: With everything built on the Power Platform, that means no additional licensing costs for your agency.

Contact Us

MetaPhase works at the intersection of business-to-IT partnerships—creating, deploying, and supporting practical solutions that serve as a force multiplier for government.
